2000-2003

#### *Clinical Pharmacy Specialist (Anticoagulation)*

Responsible for the design and implementation of a pharmacist-managed Anticoagulation Clinic within the VA Connecticut Healthcare System.

- Interfaced with healthcare providers in the design of patient treatment regimens to achieve optimization of rational and cost-effective drug therapy for anticoagulation.
- Served as an authoritative information source on drugs and their utilization in therapy, with special emphasis on drugs used for anticoagulation.
- Evaluated the drug literature by analysis of experimental design and methodology, to compare and contrast therapeutic regimens and roles for new drugs, with a special emphasis on drugs used in treating disease states requiring anticoagulation.
- Established and expand the patient data base through interpreting the drug history, medical history, physical examination and ongoing patient-specific monitoring of therapy, with documentation in the formal patient medical record.
- Designed a therapeutic regimen or plan based on patient-specific information that includes establishing a therapeutic endpoint, choosing an appropriate drug and related therapy, and establishing an appropriate dosage regimen for warfarin.
- Monitored and assessed therapeutic and adverse effects of drug therapy (including drug interactions) through selection and evaluation of physical and laboratory parameters.
- Under the supervision of a Cardiologist and with approved clinical privileges, assumed the authority to initiate and modify therapy and order lab tests as indicated for appropriate patient monitoring.
- Worked to develop, upgrade and disseminate acceptable criteria for use of formulary and non-formulary drugs and other high-cost items directed at employing cost effectiveness without compromising the quality of patient care.
- Provided physicians and other providers a focal resource for discussion of medical problems requiring pharmaceutical intervention.
- Designed, implemented and supervised the clinical education and training program for Pharm.D. Candidates and Pharmacy Residents in the Anticoagulation Clinic.
- Reviewed medication usage in anticoagulated patients as part of the overall quality assurance program and report findings to the Medication Utilization Evaluation and Pharmacy & Therapeutics committees on a quarterly basis.
