

Traineeship Learning Objectives

At the conclusion of the 2 day traineeship, pharmacists will be able to:

1. Conduct patients interviews
2. Evaluate current medications as it relates to anticoagulation therapy
3. Describe the proper technique for obtaining point-of-care INR testing
4. Adjust anticoagulant therapy for a patient based on desired outcome
5. Prepare a patient-specific monitoring plan
6. Formulate a note for the patient's chart outlining your assessment and plan
7. Describe how to bill for services

Pre-Requisites

1. All participants must successfully complete the 10-hour online training at www.pharmacy.uconn.edu/academics/ce/anticoagulation or an equivalent training as approved by the Director of CE and the faculty of the traineeship.
2. All participants must have a valid pharmacist, MD or nursing license
3. All participants must provide documentation of current professional liability insurance
4. All participants must complete the application attached
5. A telephone interview will be conducted prior to day 1 to discuss goals and expectations of the participants. A copy of clinic's policy and procedures will also be forwarded to the participant prior to the visit. Participants are expected to be familiar with the clinic's policy and point-of-care testing manual.

Anticoagulation Traineeship

A 2-day practice-based traineeship continuing education activity for registered pharmacists who are interested in the clinical management of patients on anticoagulant therapy and/or who are looking to expand their practice to involve patient management of outpatient anticoagulation therapy. This traineeship will provide you with both the clinical and administrative aspects of a pharmacist-managed outpatient anticoagulation clinic. The activity features ample time to individualize your learning experience.

Live program: initial release date March 2, 2017
